1. Introduction
Thanks for your purchasing of Thermopro Digital Instant Read Thermocouple Thermometer. You will now be able to Cook Like a Pro!

2. Features
1. Super-Fast Thermocouple Probe: High precision sensor, you can get a temp readout within 1secCOND.
2. 180° Auto-Rotating Display.
3. Motion-Sensing Sleep and Wake Modes
4. Calibration Function
5. 90 Seconds Auto-Off Feature
6. Waterproof: IP65

3. Components
1 x Thermocouple Food Thermometer
1 x Screwdriver
1 x AAA Battery
1 x User Manual

4. Product
Stainless Steel Probe
LED Display
- -
Built-in Magnet
Battery Compartment

1. LED Display: Displays the current temperature.
2. LOCK*/°F/°C: Press once to lock the current temperature for 5 seconds, press again to unlock. Press and hold for 3 seconds to switch between °F and °C.
3. Stainless Steel Probe: Super-Fast Thermocouple Probe, you can get a temp readout within 1 second.
4. Battery Compartment: Use 1 x AAA battery to power the unit.
5. Built-in Magnet: Allow you to easily attach to refrigerator or any metal surface.

5. Before First Use
1. Insert 1 x AAA battery with correct polarity (+) and (-) as indicated.
2. Wash probe tip with warm soapy sponge or cloth, then rinse and dry.
3. Wash under running water without heat.
4. PLEASE READ AND FOLLOW ALL INSTRUCTIONS.
5. The thermometer is now ready to use.

6. To Measure Food Temperature
1. Pull the probe away from the body of the thermometer to turn on the thermometer, and fold in the probe to turn off the thermometer.
2. Press and hold "C"/"F" button for 3 seconds to switch between °C and °F. Please note that the temperature unit selected will remain when you turn on the thermometer next time.
3. Insert the tip of the probe into food being cooked as shown in the picture below. The thermometer will start to measure the internal food temperature.

7. Calibration
The thermometer comes with a Calibration feature. In most cases, the thermometer was calibrated precisely at our manufacturing facility, and generally you do NOT need to calibrate the thermometer. However, after a long period of use AN3 you believe that the temperature reading displayed by the thermometer is not accurate, you may follow the process below to re-calibrate the thermometer.
1. Use distilled or purified water to make ice cubes in your refrigerator.
2. Get a thermal insulated bottle. If you don’t have one, use a beaker or a regular cup.
3. Fill the bottle with ice cubes (no less than 70% of the volume), then top off with cold distilled or purified water (no greater than 30% of the volume).
4. Stir the mixture and let it sit for 10 minutes to allow the ice and water to reach its temperature equilibrium;
5. Fold down the probe to power off thermometer first, and then press and hold the LOCK button and fold up the probe to turn on the thermometer. The "CAL" will be flashing which means the thermometer is in Calibration mode.
6. Immerse the probe in the ice/water mixture and make sure not to touch the sides of the container; wait till the temperature reading drops to its lowest value, which should be within 28°F to 36°F (or -2°C to +2°C), then press the LOCK button once and exit the calibration mode. The calibration is successful.
7. If the temperature of the ice/water mixture is not within 28°F to 36°F (or -2°C to +2°C), the calibration is not successful, you will need to follow the above steps to re-make the ice/water mixture.

Note:
The Calibration mode will only last for 15 seconds. If you’re unable to finish the calibration within 15 seconds, the thermometer will automatically exit Calibration mode.

8. Undo-Calibration
If you want to undo the calibration and go back to the default calibration setting, please follow the below steps:
1. Fold down the probe to turn off the thermometer first, and then press and hold the "LOCK" button and fold up the probe to turn on the thermometer. The "CAL" will be flashing which means the thermometer is in Calibration mode.
2. Press the "LOCK" button 5 seconds to undo the calibration and it will reset to the default setting.
9. Helpful Hints

- When measuring different foods or meat, it may be desirable to cool the probe first by rinsing the tip with cold water.
- It is recommended that you wipe the probe tip clean between readings. This is especially important when taking temperature readings from different foods or meat.
- The thermometer is designed for temporary, hand-held use. DO NOT use in an oven. Do NOT leave it in extremely hot foods or liquid (anything over 572°F) for more than 1 minute.
- Always take your reading in the thickest available portion of meat. Thin portions of meat are difficult to measure because they tend to cook through fast. Avoid touching bone. If the tip touches the bone or heavy fat area of the meat, or if the tip is not deep enough, take a second reading to ensure accuracy.
- Not intended for use by persons under age 12.

10. Care of Your Thermometer

- Do not touch the stainless portion of the thermometer during or right after measuring temperatures since it will be very hot.
- Do not place the unit in dishwasher or immerse in any liquid. To clean, wipe the probe tip with a damp soapy cloth or sponge and then dry.
- Do not leave exposed to extremely high or low temperatures since this will damage electronic parts and plastics.
- Do not keep the thermometer inserted in food during cooking.
- Remove batteries if store for more than four months.

11. Disposal

- Meaning of the "Dustbin" Symbol
  - Protect our environment: do not dispose of electrical equipment in the domestic waste.
  - Please return any electrical equipment that you no longer use to the collection points provided for their disposal.
  - This helps avoid the potential effects of incorrect disposal on the environment and human health.
  - This will contribute to the recycling and other forms of reutilisation of electrical and electronic equipment.
- Information concerning where the equipment can be disposed of can be obtained from your local authority.

12. Limited One-Year Warranty

ThermoPro warrants this product to be free of defects in parts, materials and workmanship for a period of one year, from date of purchase. REGISTER your product after purchase and RECEIVE EXTENDED 3 YEARS Warranty on our website: https://themapro.com/pages/warranty-registration Should any repair or service under this warranty be required, please contact Customer Service by phone or email for instructions on how to pack and ship the product back to ThermoPro. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

12. Customer Service
